Self Measurement gives security

Why reliable blood pressure readings are so important!

Did you know that almost one out of two adults all over the world* suffers from hypertension? This presents an enormous health risk if it is not adequately treated and monitored. Heart attacks, strokes and severe organ damage could be the hazardous, long-term consequences.

Tensoval comfort classic is a fully automatic, high-quality blood pressure monitor that provides quick and accurate measurements through its compact size, user-friendly design and its simple handling.
