HARTMANN	Technical Data Sheet
RespoSorb® Super	SpecNo.: D 6.1203
	Department: DEV-PHF
	Date: 2018-04-05

1. General Product Description

RespoSorb® Super is a sterile absorbent pad, made of soft cellulose fibers (fluff) blended with Superabsorber (= fluid storing Polymer); enclosed in a cellulosic tissue layer for secretion distribution; covered on the back side by an hydrophobic nonwoven, being water-repellent and permeable to air; and on the wound side by a non-adherent and hydrophilic nonwoven. The back side is characterized by green colour.

RespoSorb® Super carries the CE mark according to EU directive 93/42/EEC for medical devices. The product is classified as a class IIb medical device.

A conformity assessment has been performed for RespoSorb® Super and it has been shown to be in compliance with all applicable requirements of the above mentioned directive.

The safe use of RespoSorb® Super, therefore, is ensured if the product is used in line with the intended purpose.

2. Application / Indication

Indication:

RespoSorb® Super is especially suitable for the treatment of superficial, severely exuding acute or chronic wounds.

Application:

Place RespoSorb® Super with the white side on the wound so that the green nonwoven layer faces away from the wound.

The product cannot be cut to size.

3. Presentations

Products are packed individually in sterile peel-packs.

Size (cm x cm)	Products/box	Boxes/carton	Cartons/pallet
10x10	10	6	88
10x20	10	6	64
15x20	10	6	42
20x25	10	6	28
20x40	10	5	24

4. Product Characteristics

Absorbent core

Material:

- Wound side

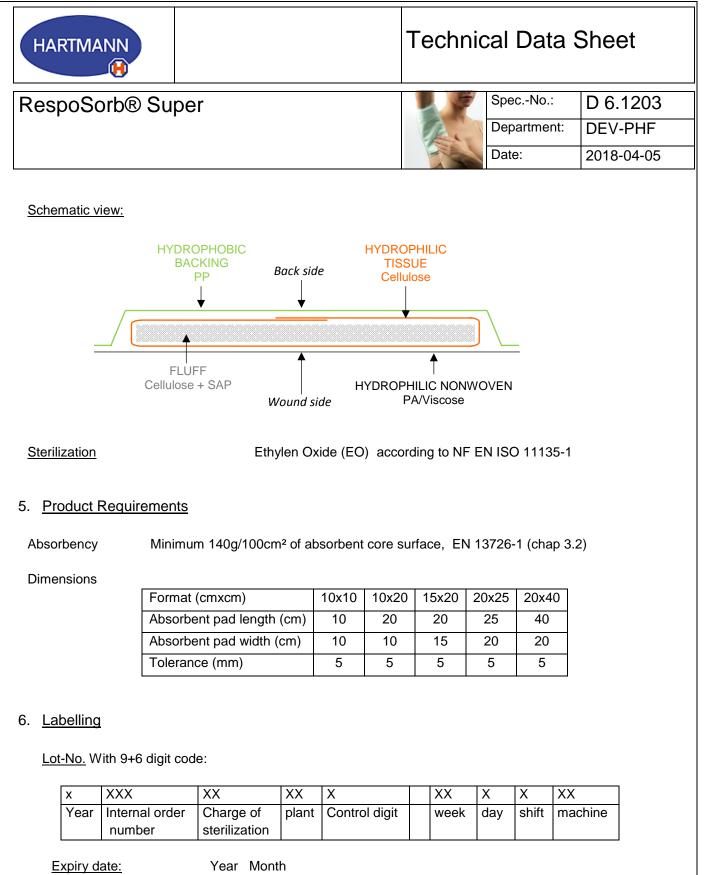

Hydrophilic nonwoven PA/Viscose (55/45%)

Hydrophilic cellulose fibers + Superabsorbent Polymer (SAP)

- Tissue Hydrophilic cellulose
- Backing
- Hydrophobic nonwoven 100% PP
